Dear Warwick

End of Year Message

Warwick – I thought I would just take the opportunity to wrap up the end of this year with a thank you note to you and your team for the work effort put in over the past 12 months.

As you are aware, there have been numerous demanding situations to which you and your team have responded to. This has been much appreciated by numerous parties around the bank, although at times it does seem to be a thankless task.

Your ongoing advice and willingness to go the extra mile (value add), has certainly not gone unnoticed and has been commented on by various colleagues. The support provided to our on-site Technicians during relocations etc. has also been much appreciated. In every instance, our Technicians have enjoyed the opportunity to work with your team and have very much appreciated the support and assistance provided.

Can you therefore, please pass on mine and my colleagues thanks and appreciation for the support and we look forward to carrying this forward in to the new year.

All the best to everyone for Christmas and the New Year.

Regards

David L Scott

Managing Director
Data Wiring Systems Ltd
40 Alken Terrace
Kingsland
Auckland

Dear Warwick

I would like to extend my thanks to you and your team at Data Wiring Systems for consistently delivering a high level of service to the BNZ over the past 12 months and beyond.

The nature of our business demands that short notice for urgent action is often requested. It is reassuring to be able to always rely on Data Wiring Systems to complete these requests professionally and within the shortest timeframes possible.

An excellent example of your overall commitment was evidenced when BNZ was recently required to vacate its branch sites at Auckland International Airport. This job entailed very tight timelines together with very precise demands, so as not to adversely affect airport operations. You took on the entire operational project management of this undertaking, which entailed closing seven branches and either relocating or removing eight ATM's. The organisational and communication requirements of this task were extremely demanding, involving numerous contractors, including builders, painters, Telcos, security personnel together with the BNZ and the airport management. During this period you displayed exceptional organisational and coordination skills and your staff showed a high level of integrity and dedication, ensuring that the job was completed. All of this resulted in long days and nights for your staff and yourself.

This was a particularly sensitive time for BNZ Airport staff, some of whom were losing their jobs and your team displayed tremendous understanding of the situation, making it easier for all BNZ staff affected. This further characterises your teams complete professionalism and continuance to deliver over and above expectations.

Over and above everything else, I get particular personal value through regular discussion and advice on numerous elements associated with BNZ work. Without this unheralded and unrewarded work we would not be able to continually deliver to a high standard on our value proposition to our major internal clients, the branch network and Corporate Centre.

Data Wiring Systems Ltd.

Computer, Telephone Security, & Electrical Cabling Specialists

It therefore goes without saying that I can completely trust and rely upon you and the rest of the Data Wiring Systems team to get the job done with the utmost professionalism, delivering a consistently high standard of workmanship.

Regards

Yours sincerely

TO WHOM IT MAY CONCERN

RE : DATA WIRING LTD

Data Wiring has provided services to the Bank of New Zealand over the past 17 years.

This work has ranged from cabling, electrical & lighting sub-contracting to renovations, LAN, ATM and communication installations and lately project management and professional services involving PC & printers.

On all occasions the Data Wiring team have acted professionally, with integrity and displayed a level of knowledge that has always given the Bank confidence that the work will be done correctly, within agreed timeframes and with minimal impact to our staff.

I recommend their services without reservation.

Yours faithfully,

David Browne
Head of Corporate Affairs

TOYOTA FINANCE NEW ZEALAND LIMITED

11 December 2001

Mr Pat Stewart
Data Wiring Systems Ltd
PO Box 32-168
Auckland 9

Dear Pat

I am writing to express my thanks for the extra effort that Harry Koks and his team put in to make the move to Toyota Financial Services new premises as smooth as possible.

Since our relocation we have had no problems with any of the work that Data Wiring Systems provided and I was impressed with the support offered during and since the work has been completed.

Due to many changes in the plans the wiring job was not a smooth process, yet Data Wiring Systems were one of the few contractors to finish on time. Also, despite the added problems I found your staff at all times to be professional, reliable and forthcoming with ideas to make our outcome better.

I believe it is worth pointing out that a large part of our decision to use Data Wiring Systems was due the professionalism and thoroughness of Harry Koks. I believe that we can attribute much of the success of the move to Harry's project management skills and these were commented on by a number of parties.

Accordingly, I would appreciate it if you could once again pass our thanks on to Harry, Andy, Peter and the rest of your team who worked on our job.

Yours faithfully

Dear Warwick

A big Thank You to yourself and your team for helping us with our IT/Communications systems relocation on Labour Weekend. It was a big undertaking for us and was achieved without massive interruption to our business, and therefore a successful project.

Flitway really appreciates the assistance from everyone involved including Tim Edhouse, John and Ali and yourself.

At the same time, we are thankful that it is now behind us!

Kind Regards

Cyrus Wadia
